

Origami Cross

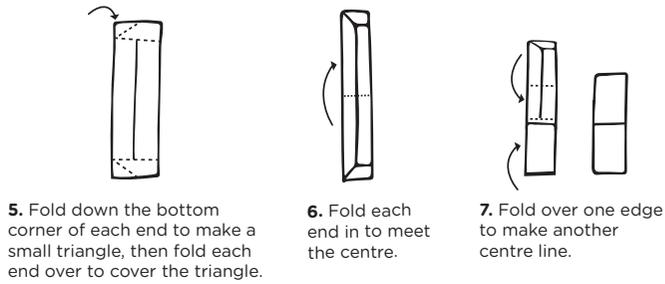

1. You will start off with two pieces of paper – start off with the shorter piece.

2. Fold it down the centre line and unfold.

3. Using that fold as a guide fold in the two edges into the centre.

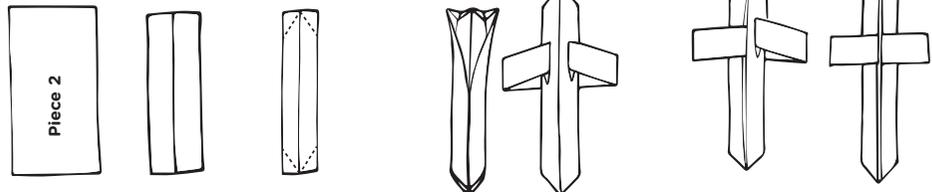

4. Fold both edges in again to the centre fold.

5. Fold down the bottom corner of each end to make a small triangle, then fold each end over to cover the triangle.

6. Fold each end in to meet the centre.

7. Fold over one edge to make another centre line.

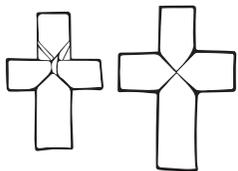

8. Repeat stages 2-4.

9. Fold down each corner of each end to make small triangles.

10. Open up each end and fold the triangles inside themselves to make an inverted fold on each corner.

11. Slide this piece inside the other piece you made earlier to make a sword shape. Then tuck the folded edges from piece 1 under the folds of piece 2.

12. Fold down each end of piece 2 and slot the triangle points into piece 1 to secure your cross.

To get piece 1 and 2 to start making your cross, fold and tear along the solid lines on the other side of these instructions.

Prayer Aid

On Easter/Holy Saturday, 3rd April, Christian organisations and prison Chaplains from all over the UK are joining together to host an online 24hr prayer event to pray for all those affected by imprisonment. We would love it if you could use this activity to pray with us by writing your prayers in the space provided and then making your cross.

YOU DO NOT NEED THIS PIECE!
